Sustainability standards along Meyer Burger's supply chain

Dear Partners,

Meyer Burger is committed to keep ensuring highest social and environmental sustainability standards in our own production as well as throughout our supply chain. Specifically, we source the key raw materials for our high-performance solar modules through the following supply chain, in reverse order:

1. Modules: Since the start of our business operations in 2021, we have been manufacturing 100% of our modules in our Freiberg site in Germany. From Q2/2024, we will also start producing modules in our first international manufacturing site in Goodyear (Arizona), United States of America.
2. Cells: Same as for our modules, we have been producing 100% of our cells in our Thalheim (Bitterfeld) sites in Germany since 2021. From Q4/2024, we will begin producing cells in our first international cell-manufacturing site in Colorado Springs (Colorado), United States of America.
3. Ingots/wafers: The ingot and wafer manufacturing is carried out by a small number of qualified suppliers in Asia and Europe. The Asian suppliers do not produce in regions affected by forced labor practices. In order to strengthen the European supply chain, Meyer Burger has also signed a supply agreement for silicon wafers with the Norwegian manufacturer Norsun.
4. Polysilicon: A small number of qualified suppliers in Asia and Europe carries out the polysilicon manufacturing. Amongst other sources, Meyer Burger uses polysilicon from Wacker. Wacker operates polysilicon production facilities in Germany as well as in the United States.
5. Metallurgical silicon: Our polysilicon suppliers have given us written assurances that they do not source their input materials from suppliers and/or regions where forced labor is used.

Furthermore, Meyer Burger is very active on political level in Germany as well as on European level. We are trying our best to support creating a healthy environment for more producers along the solar supply chain to settle and increase their capacities in Europe.

Please do not hesitate to contact us if you have any further questions. You are also kindly invited to visit our cell and module manufacturing lines in Bitterfeld and Freiberg.

Best regards,

Your Meyer Burger team
